

CRYPTO-BOX® – Compliance and Usage Notes

CE Compliance

This product is CE marked in accordance with the applicable EU directives. The conformity statement can be obtained from our web page: www.marx.com/en/about/certificates

FCC Compliance

The product complies with FCC title 47, part 15, subpart B.

RoHS

The product is RoHS compliant according to RoHS II Directive 2011/65/EU and amendment EU 2015/863

WEEE (only valid for EU member states)

This symbol indicates that this product may not be treated as household waste. For more detailed information about recycling of this product and collection points, please contact your local authority.

Help protecting the environment by recycling used products.

Electrostatic Discharge (ESD) Precautions

This product was designed to resist high levels of electro-static discharge (ESD); however, extreme levels of ESD may cause damage. For example, when walking on a synthetic carpet (especially on dry days), a person can generate enough static electricity to cause a spark while touching a metal object. Use the following precautions to protect the product from ESD:

- Keep the product in anti-static bags until ready for use.
- Touch a grounded metal object before touching the product.
- Avoid touching the contact pins.

Handling Precautions

In order to avoid damage to the product or to the information written in it's internal memory, please observe the following precautions when handling the product:

- Do not exceed the temperature range specified in the data sheet of the device model you are using.
- Do not leave the product in places that are extremely humid for a longer time.
- Do not remove the product from the USB port while an application is accessing it to avoid data loss or corruption of the internal memory. Exit the application or shut down the computer before removing it.
- When attaching the product and other USB devices without external power supply to the same USB hub or when using a passive USB hub, please make sure that the overall power consumption must not exceed 500 mA. Otherwise it may lead to incomprehensible errors or damages to the product.

CAUTION:

The surface of this product can become hot. Avoid prolonged contact to prevent skin irritation and/or heat injury! Make sure to keep the product away from anything heat-sensitive during operation.
